Session

SESSION NAME (optional)

Shoulders & Arms

DATE (auto-fills today)

03/01/2026

▼ 🧠 Nerve Status Check-In (optional)

Tap any spinal levels that feel compromised today. Muscles served by those roots will be flagged ⚠️ in the builder so you can route around them.

⚠️ **Important:** Routing does not eliminate pain. If you have degenerative disc disease or nerve compression, some discomfort is likely regardless of exercise selection. The goal is to avoid putting a *primary training load* on an already-stressed nerve root — not to train pain-free. Flagged muscles may still be involved as stabilizers; this tool helps you choose exercises where they aren't the prime mover. Always work with your physician or PT.

CERVICAL

C1-C2

C2-C3

C3-C4

C4-C5

C5-C6

C6-C7

C7-C8

THORACIC
